The image shows a black smartphone keyboard with white keys and icons. The layout is as follows: Row 1 (top) has keys Q (1), W (2), E (3), R (4), T (5), Y (6), U (7), I (8), O (9), and P (0). Row 2 has keys A, S, D, F, G, H, J, K, and L. Row 3 has keys Z, X, C, V, B, N, M, and a backspace key with a red 'X' icon. Row 4 (bottom) has keys ?123, a microphone icon, a large space bar, a period key with three dots, and a left arrow icon. Below the keyboard are three additional icons: a left arrow, a pentagon, and a square.

Mobile Phone Security

- They are easy to intercept
- They act as an accurate tracker
- They can be used as an audio bug, even when turned off - because unless the battery is completely removed the phone can be turned on (without showing anything on the screen)
- They have two identifying features which are unique identifiers
 - The simcard, which has its own unique identifying number
 - The IMEI which is unique identifying number for each mobile phone
- Many people make the mistake of

- Buy a separate, pay as you go SIM card and phone

- Only use this for sensitive communication never for anything else

- Ensure it has a strong PIN password on it and change it frequently

- Do not install any applications on it

- Try not to turn it on and use it
